

CXone Contact Centre Complete: Built to fit the continuously adapting small business

Deliver exceptional customer experiences and create more profitable customer relationships with CXone, the all-in-one cloud contact centre platform from NICE inContact, the recognised industry leader in small contact centre solutions.

The CXone Contact Centre Complete package is ideal for small businesses who want to communicate seamlessly across 30+ channels including voice, chat and email—and continuously learn and adapt with game-changing technology.

Ignite productivity with Automatic Call Distribution (ACD) and over 30 channels of communication

Match the right call to the right agent and reduce average handle time—every time. CXone ACD is an omnichannel routing engine that intelligently distributes voice and digital interactions from a universal queue for inbound and outbound voice and 30+ digital channels including email, web chat, messaging platforms like WhatsApp, Twitter Messaging, Facebook Messenger, Text/SMS, Social Media and Mobile Apps.

Cut your cost-per-call with Interactive Voice Response (IVR)

CXone IVR drives down cost by enabling your customers to choose self-service or agent assistance. Callers can quickly self-solve basics like bill pay and account inquiries—freeing agents to service more complex issues.

Master compliance with Audio and Screen Recording Pro

Secure voice and screen recording for audio and digital channels helps you meet GDPR, PCI and HIPAA standards, including encryption, automated and on-demand masking, consent-based recording, extensive retention options, and Key Management. Easily search, retrieve, and monitor recordings in an intuitive interface.

Streamline communications with Integrated Softphone

Provide embedded communications as a seamless component of the agent application for inbound and outbound phone skills. Enable clear, web-based voice calls as an alternative to desktop Voice over IP (VoIP) softphones or hard phone alternatives with the same rich telephony features without ever leaving the browser.

The CXone Contact
Centre platform

CXone is the cloud-powered contact centre platform that's built to fit and accelerate every stage of small business development. There's no expensive IT equipment to buy or maintain—releasing budget for growing the business. All of our solutions are easy to set up and maintain with easy drag-and-drop configuration. For small business, CXone is the one to grow with.

Optimise employee performance with Workforce Management Pro (WFM)

WFM is an AI-enabled, omnichannel forecasting tool that can help you exceed your contact centre goals. Empower agents and supervisors with automated workflows and self-managed schedule requests. Optimise intraday performance. And eliminate manual processes.

Enhance agent interactions with Quality Management Pro (WFM)

Better customer experience starts with better agent interaction. Now you can give your agents more relevant feedback by automatically analysing each interaction based on category, sentiment and user-defined keywords and phrases. Simplified dashboards let you fast-track your quality program while reducing evaluation time.

Use AI to win and retain customers with Interaction Analytics Pro

This AI-powered analytics and reporting tool identifies root cause and trends across 100% of your customer interactions. A single, unified view lets agents uncover subtle aspects of customer experience like voice inflection to improve first-contact resolution and boost customer satisfaction.

Learn how to delight your customers with Feedback Management

Omnichannel customer surveys deliver in-depth analytics and benchmarking capabilities to drive actionable insights with minimal effort. Gain a comprehensive understanding of the customer experience to clearly identify strengths and opportunities. Coach and recognise agents with quantified interaction details to drive better performance.
